Water Atlas Page 303
Sewer Atlas Page 39-2-26

Dear Mr. Kalayil:

This letter is in response to your inquiry concerning the proposed vacation. After reviewing our records, we have determined the following:

I) The Department of Water Management - Water Section

There is an 8-inch water main and hydrant installed in 2013 within the area proposed for vacation. There are three water services connected to this main that serve buildings that are all part of the Church of the Holy Family and St. Ignatius College Prep Campus (St. Ignatius).

The Department of Water Management (DWM) will allow St. Ignatius to take ownership and maintenance of approximately 155 feet of this main within the limits of the area proposed for vacation. Once the water main has become the property of St. Ignatius and is no longer a city water main, the vacation can be approved.

To accomplish this, DWM must do the following:

a. Install a new hydrant at approximately 1030 S May Street (the new location of the end of the water main). The estimated cost to do this work is $17,610.00. The DWM will be responsible for obtaining all applicable permits, excavation/OSHA shoring, backfilling/compaction, traffic control, pipe work, supplying all water main pipe, valve operations, engineering design services, and water quality services, but St. Ignatius College Prep will be responsible for all final restoration to CDOT standards. Actual costs will be submitted for payment upon completion of the work.

b. The existing 8-inch water main that DWM is relinquishing ownership of was installed in 2013 and as such, is not fully amortized. The total fixed unamortized cost for this 8-inch water main is $61,742.51, which DWM must be reimbursed.

c. See the attached letter dated April 12, 2024 for further details on these items and instructions for making the total deposit of **$79,352.51** ($17,610.00 + $61,742.51).

In addition, St. Ignatius must complete the following items at their expense:

1. Install a new compound meter in a vault south of the new hydrant,
2. Replace the existing 2-inch lead water service on the western frontage of S May Street located at approximately 355 feet south of the south property line of W Taylor Street with a new copper service.
3. Install a backflow preventor for the existing 4-inch water service on the eastern frontage of S May Street located at approximately 471 feet south of the south property line of W Taylor Street. The backflow preventor must be as close as possible to the 4-inch water service connection to the 8-inch water main and inside an above-ground hotbox.

For questions regarding water facilities, please contact Andrew McFarland at andrew.mcfarland@cityofchicago.org.

II) The Department of Water Management - Sewer Section

Based on sewer records, the following public sewers, associated structures, and sewer easement reservations are present within and adjacent to the area proposed for vacation:

a) A 12-inch sewer running east-west within the area of proposed vacation.

b) A 24-inch sewer running north-south within the area of proposed vacation.

c) Sewer easement in vacated W 11th St from the east line of S May to the west line vacated S Aberdeen St per Ordinance passed July 7,1960. There is a 12-inch sewer within this easement reservation.

d) Sewer easement in vacated S May St per Ordinance passed April 11, 2007 from W Roosevelt Rd to approximately 300 feet north of the north line of W Roosevelt Rd. There is a 24-inch lined sewer within this easement reservation.

To approve the proposed vacation, the following requirements must be met:

1. Since the sewers listed above shall solely serve the Beneficiary, the Beneficiary must assume ownership of all the sewers and appurtenances listed above.
2. These sewer facilities will be the private property of the beneficiary. The beneficiary must assume all liability for these facilities and be responsible for all maintenance and repairs for their reuse.
3. Since the sewers in the easements of c) shall solely serve the Beneficiary, the DWM shall release the easement reservations and the beneficiary must assume ownership of all the sewers and appurtenances listed above.
4. A manhole must be installed within the Right of Way of S May St. to delineate between the private sewer within the area of the proposed vacation and the public sewer.

5. Since the sewers in the easements of d) shall solely serve the Beneficiary; This sewer and sewer appurtenances were lined in 2012 and not fully amortized. The estimated unamortized cost for this lining is $93,255.60. The DWM shall release the easement reservations when a certified check in the amount of $93,255.60, payable to the City of Chicago, must be hand delivered to the Department of Buildings, 121 North LaSalle Street, Room 906, Chicago, Illinois, 60602, with a copy of this letter. The beneficiary must assume ownership of all the sewers and appurtenances listed above.

6. If and when the existing private main sewers and appurtenances are abandoned, the abandonment plans must meet the Department of Water Management, Sewer Design Section's requirements.

7. It is the owner's / developer's responsibility to provide proper drainage in the areas to be developed. When the final plans are available, the owner's / developer's engineering staff must discuss those plans with Sewer Section Engineering Personnel. The plans must be submitted through the OUC-EFP review process.

8. In the event that the Beneficiary is unable to complete the sewer installations in the proposed relocated cul-de-sac, a deposit is required from which the DWM-Sewer may complete the sewer work. The required deposit amount for the Sewer Section is **$65,604.12**. This estimate is based on current rates for labor, materials, equipment and overhead charges, but actual costs will be billed to the Beneficiary upon DWM's completion of the work. A certified check in the amount of **$65,604.12**, payable to the City of Chicago, must be hand delivered to the Department of Buildings, 121 North LaSalle Street, Room 906, Chicago, Illinois, 60602, with a copy of this letter.

9. Please be advised that any underground sewer work, including the public main sewers and sewer structures associated with the proposed area, must be submitted for review and installed at the expense of the beneficiary.

10. Please be advised that any development creating more than 7,500 sq-ft of at grade impervious surface or disturbs a land area more than 15,000 sq-ft shall be subject to the regulated development requirements of DWM's Stormwater Regulations and must go through DOB Stormwater review.

If there are any questions regarding the sewer facilities, contact Alexander Huynh at 312-744-4420 or Anupam Verma at 312-742-7108.

Very truly yours,

Randy Conner JV

Attention: John Chandler
President

SUBJECT: Proposed Street Vacation
New Cul-de-Sac
S May Street – W Taylor Street to 480 feet S of W Taylor Street
BES Project No. 24-01:263
VD No. 123274

Mr. Chandler:

This correspondence is in response to the request to vacate S May Street at the subject location to accommodate the construction of Sodality Hall. Final plans for the proposed development must be submitted for DWM review and approval prior to construction. This letter is not an approval for the construction of or water service to the proposed Sodality Hall.

The Department of Water Management - Water Section

This Department will be performing sewer facility adjustments within the subject project limits. Please contact the Force Account Construction Manager at FACM@dwmpmo.net to coordinate construction. St. Ignatius's contractor must not begin work until the sewer facility adjustment work is completed by DWM.

This Department maintains an existing 8-inch water main located at approximately 19 feet east of the west property line of S May Street and an existing fire hydrant on the western frontage of S May Street located at approximately 480 feet south of the south property line of W Taylor Street, both of which are located within the proposed vacation limits.

In order to accommodate the proposed street vacation, St. Ignatius College Prep must take ownership and maintenance of approximately 155 feet of the abovementioned 8-inch water main and the fire hydrant within the vacated area. Private fire hydrants must be painted federal safety green. The Department of Water Management must also install a new fire hydrant at approximately 320 feet south of the south property line of W Taylor Street to be owned and maintained by the DWM to allow for flushing of the public water main. The estimated cost to install this fire hydrant is **$17,610.00**, based on *regular* time. The DWM will be responsible for obtaining all applicable permits, excavation/OSHA shoring, backfilling/compaction, traffic control, pipe work, supplying all water main pipe, valve operations, engineering design services, and water quality services, but St. Ignatius College Prep shall be responsible for all final restoration to CDOT standards. All new curb installation adjacent to fire hydrants must be painted 'safety yellow' for 15 feet on each side of the fire hydrant except where the 15 foot dimension intersects a crosswalk, driveway or similar feature.

Please note that this estimate is based on current rates for labor (regular time), material, equipment and overhead charges, but actual costs will be submitted for payment upon completion of the work. Should it be determined that the fire hydrant cannot be installed at the proposed location, St. Ignatius College Prep will be responsible for all additional costs associated with installing the fire hydrant.

The existing 8-inch water main that DWM is relinquishing ownership of was installed in 2013 and as such, is not fully amortized. The total fixed unamortized cost for this 8-inch water main is ***$61,742.51***, which DWM must be reimbursed.

A deposit in the amount of **$79,352.51** ($17,610.00 + $61,742.51) payable to the City of Chicago is required. In order to receive an invoice for this deposit, send a copy of this letter to BPermits@cityofchicago.org via email. Print two (2) copies of each invoice and bring the invoices for payment to a City of Chicago payment center. Once payment has been made, the applicant should forward a copy of the receipt, stamped invoice, and copy of this letter to BPermits@cityofchicago.org. Upon receipt of the proof of payment, DWM will respond with copy of the BPermit.

Before the DWM can install the proposed fire hydrant and transfer the ownership of the abovementioned facilities to St. Ignatius College Prep, St. Ignatius College Prep's contractor shall perform the following:

- Install a compound meter in a meter vault south of the abovementioned proposed fire hydrant. DWM will coordinate the location of the hydrant and meter vault with St. Ignatius College Prep's consultant.
- Entirely replace the existing 2-inch lead water service on the western frontage of S May Street located at approximately 355 feet south of the south property line of W Taylor Street with a new copper service.
- Install a backflow preventor for the existing 4-inch water service on the eastern frontage of S May Street located at approximately 471 feet south of the south property line of W Taylor Street. The backflow preventor must be as close as possible to the 4-inch water service connection to the 8-inch water main and inside an above-ground hotbox.

Please contact the Department of Buildings, Plumbing Permit and Plan Section at (312) 744-7060 or by email Bpermits@cityofchicago.org regarding the proposed water service connection for the building and all the work mentioned above. Per the Municipal Code, meters shall be installed before the building is connected to the water system. All new water services must be compliant with Title 35 of the Illinois Environmental Protection Agency (IEPA). The meter vault and hot box locations must be submitted for review and approval to the Chief Plumbing Inspector, Denis E. Riordan, at Denis.Riordan@cityofchicago.org.

Any traffic and pedestrian protection structures such as canopies, scaffolding, jersey walls, construction barricades, etc., which are located within 10 feet of water main facilities will restrict this Department's continuous access to its facilities for maintenance or repair work. Therefore, should this Department require access to its existing facilities, the St. Ignatius College Prep will be responsible for either removing the traffic and pedestrian protection structures or performing any necessary excavation required to provide this Department safe access to its existing facilities within 24-hour notice. Traffic and pedestrian protection structures must be installed to allow for complete accessibility to all DWM facilities, including fire hydrants, valve basins, sewer manholes, and catch basins.

All new sewer installations or reused sewers must meet IEPA separation requirements for water and sewer pipes. All proposed/replaced or reused sewer laterals from catch basins/inlets, sewer mains, and private drains (collectively known as "sewer facilities") that are parallel to water mains, services or fire hydrant leads (collectively known as "water facilities") that are less than 18 inches below the water facility and have less than 10 feet of horizontal separation from the outside edge of the water facility must be made out of ductile iron/water main quality pipe for 10 feet on either side of the outside edge of the water facility. Additionally, all sewer facilities that cross perpendicularly below water facilities with less than 18 inches vertical separation must be made out of ductile iron/water main quality pipe for 10 feet on either side of the outside edge of the water facility. If any sewer facility crosses perpendicularly above a water facility, then the sewer facility shall be at least 18 inches above the water facility and the sewer facility must be made out of ductile iron/water main quality pipe for 10 feet on either side of the outside edge of the water facility. Sewer laterals that require ductile iron/water main quality pipe shall be ductile iron/water main quality pipe from the catch basin to a point 10 feet beyond the edge of the water facility.

Proposed trees must not be planted within 5 feet of the exterior pipe wall for all water mains 24-inch in diameter and larger. This 5-foot rule excludes mains that are separated from the tree by a hardscape feature or other root growth limiting conditions such as water mains located in the street.

This Department discourages tree planting over water mains that are less than 24-inches in diameter located in the parkway, but if necessary will allow trees with a maximum mature height of 30 feet and a maximum mature root depth of 2½ feet. Potential plantings that meet this requirement include the following:

1. Ornamental shrubs or bushes meeting the mature height and mature root depth discussed above.
2. Flowers or other non-woody herbaceous plants.
3. Above ground, movable planting containers that can be relocated by the owner of the plantings in the event that access to the water main is required.

Existing trees planted above water mains that do not meet these requirements do not need to be removed. However, if such existing trees are removed, all proposed trees installed in their place must meet the above-mentioned requirements. Should it be necessary for the DWM to access any of its facilities, the Department shall only be responsible for typical pavement, sidewalk, and grass restoration.

If construction requires the use of water from a City fire hydrant, or adjustments or repairs are required to any City sewer facilities in proximity to the project site, permits must be obtained from the Department of Water Management, Water and Sewer Sections.

Under new State of Illinois requirements, partial lead service line replacements are not allowed. Therefore, if your project requires lead service line replacements (or if this replacement is triggered by repair work undertaken as part of your project) this work will be performed by DWM (or by DWM contractors). The DWM costs for this replacement shall be assigned to the applicant as part of your project costs.

Extreme caution is to be taken to ensure that no facility owned and maintained by this Department is damaged during construction. If damage occurs to any facilities, St. Ignatius College Prep will be held responsible for the cost of repairing or replacing them.

Please note that the details described above are valid for 90 days from the date of this letter, after which time, St. Ignatius College Prep will be responsible for re-submitting plans to this Department for review and revision of the estimate of cost, as needed. ***Failure to comply with the provisions in this correspondence may result in additional expenses to the proposed project to verify that all work conforms to DWM's standards.***

If there are any questions regarding the water facilities, please contact Bureau of Engineering Services at 312-744-5070.

Sincerely,

Randy Conner
